Imajine

Imajine was a party organised by the oldest group of the Scouting group “Scoete van Roi” in Meise, Belgium. The party took place the 28th of April 2023 in the youth house Den Droes. Here is how I made their branding and promotional materials.

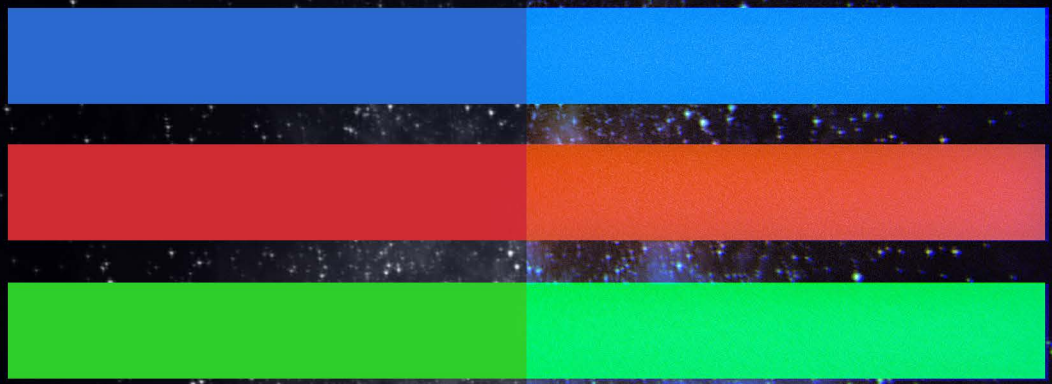

Logo

For the logo a font was chosen that has sci-fi and neon vibes. The roundness of OPTIFormula-One worked perfectly. This font is also used on other parts of the poster

Colours

The primary colour chosen was blue, firstly because of the space theme, secontly because it grabs attention. The grading also went for a highly vibrant look.

Effects: Stars

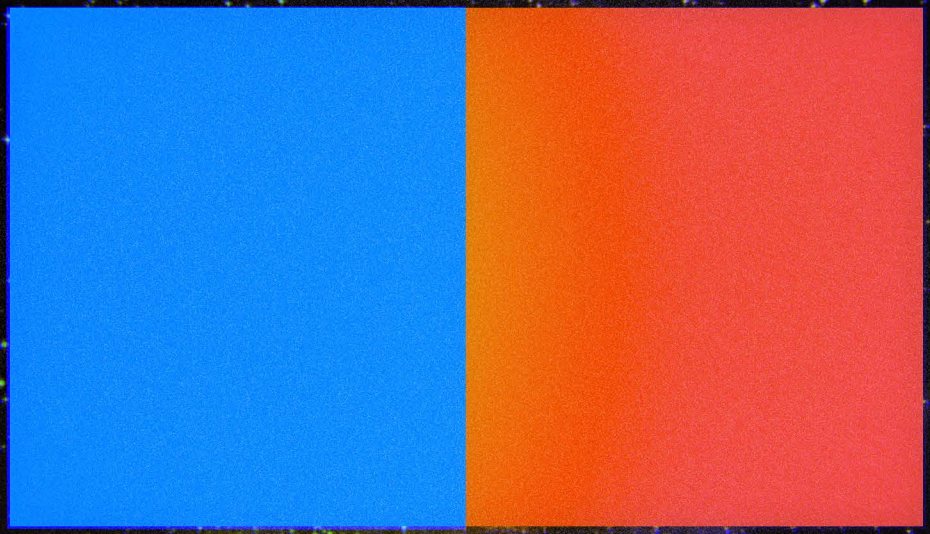

The effect of the stars around the logo and text is a recreated effect of a diffraction filter on a 55mm lens.

An example photo of
the effect on a real photo

Effects: Distortion

The whole image has a stuble colour distortion applied to the red and blue channels. The red channels got less details while the blue chanel got more details. This is to get an 80s VHS effect.
